TOYOTA – 70 SERIES UTES

UPGRADE

– TRANSFER OF TUFF BULLBARS FROM NON –AIRBAG TO AIR BAG EQUIPPED UTES

What you need: 1 x set of Bull Bar mounting Brackets (air bag compliant).

By fitting new Bull bar brackets designed for the Air bag equipped 70 Series V8 Toyota utes, it is possible to make use of bars built for the previous non-air bag models.

Note: Before fitting the new brackets, please cut the mounting plate of the old style bar where indicated here. Protect the cut from rust by painting.

This simple modification will extend the life span of Tuffbars fitted to your fleet of V8 Toyota Landcruiser utes.

A real saving.
